

Nature 2 Express from Zodiac, your questions answered

1. With Nature 2 Express, will pool maintenance be different in any way?

Yes. Nature 2 Express reduces very considerably the need for pool chemicals and general upkeep. The water is controlled and cleaned as before, but the filter will stay a lot cleaner and it will be very much easier to obtain the right water balance.

2. But do I still need to use chlorine?

You'll need to use a small amount of slow-acting chlorine which works so as to disinfect the water in synergy with the minerals provided by Nature 2 Express and oxidise all the particles that are eliminated. With Nature 2 Express, we recommend a very low chlorine content, which won't even be noticed by the people using the pool.

3. When do I need to carry out shock chlorination?

You won't need to do this as a routine preventive measure, but only if the water turns cloudy. Besides that, when you put in a new cartridge, you will need shock chlorination to activate it.

4. Can it be used with other products?

Yes. Nature 2 Express can be used with most standard products, except for bromine based treatments, chlorine free disinfectants of the biguanide type (PHMB) or products containing copper. And if necessary you can always come back to standard chlorine treatment any time you want.

5. Is Nature 2 Express a filter?

No. A filter's job is to remove dirt and impurities. Nature 2 Express cleans the water by destroying bacteria, algae and viruses that are too small to be caught by the filter. You need a combination of the two, a filter plus Nature 2 Express, with the filter working exactly the same as it would without Nature 2 Express.

6. Is there anything likely to affect the life of the cartridge?

No. Filtration time, intensive use, high temperatures, none of these things affect the life or efficiency of the cartridge, which remains active for six months in any private pool.

7. Are the minerals safe, even in very small quantities?

The minerals used with Nature 2 Express are absolutely no threat to health, because they're used in tiny concentrations which never under any circumstances increase (the system uses no electrical power and the minerals are only present in the form of trace elements).

Nature 2 Express: the easy way to treat your pool!

- Using for the first time: install the cartridge, shock chlorinate your pool and maintain 3 days continuous filtration.
- There after, in regular treatment: 1 tablet (200 gr) of slow-acting stabilised chlorine* per 60 m³ for 7 to 10 days (or equivalent in pellets, granules, etc).
- No need for shock chlorination, flocculation or anti-algae precautionary treatment; only carry out a shock chlorination if the water is cloudy.
- More stable pH, to be checked regularly.

(*: trichloroisocyanurate - average doses in normal weather conditions)

→ For **in-ground pools up to 75 m³** (or an average 10 x 5 m pool).

→ **Suits every pool** with a Ø 50 mm pipe.

Zodiac, mastering the elements.

Renowned worldwide for the quality and reliability of its products in the aeronautical and marine sectors, Zodiac has now brought its expertise to swimming pools, to bring you a full range of pools, automatic pool cleaners and water treatment systems. Backed by Nature 2 technology, expertise and experience, Zodiac brings you the reassurance of top quality equipment in terms of both design and performance. A real guarantee of efficiency and peace of mind!

ZODIAC

Nature² Express

Install the **Nature 2 Express mineral water purifier** yourself in just 10 minutes to enhance your enjoyment of your pool.

Day after day,
less chlorine
softer water.

*Natural Mineral Purifiers
for Pools and Spas*

Nature 2 Express from Zodiac, exceptional water for the whole season.

- Natural, less chlorine, imperceptible to the bather, no odour, no irritation to the skin or eyes.
- Clear all day long.
- Constant protection.
- More stable pH, less control.

With Nature 2 Express from Zodiac, day after day, softer water.

- On-going purifying action for a whole 6 months. Requires no electrical connections and no adjustments.
- Ceramic balls collect the particles that the filter fails to stop, to clarify the water in your pool day after day for 6 months.
- Disinfectant mineral particles are distributed throughout the pool. These minerals are added in controlled amounts and they combine with the chlorine to enhance its effectiveness against bacteria, algae and micro-organisms.

Nature 2 Express from Zodiac, install it yourself !

Step 1 - Stop the pump.
Fit the 2 parts of the collar
to the hose using the 4 screws
and nuts supplied.

Step 2 - Make a hole in the PVC
pipe using the cutting tool
supplied and an electric drill.

Step 3 - Insert the flow sensor
into the hole and clip into position.

Step 4 - Push the top part
of the purifier down
over the collar.

Step 5 - Screw the cartridge
inside the collar, restart the pump
and activate the cartridge.

Detailed instructions enclosed.
