Thank you for taking time to explore the world of Catalina Spas.

Founded on over forty years of manufacturing experience, Catalina has an unparalleled reputation for quality and reliability. I established Catalina UK over 17 years ago to distribute and provide UK client support. We take great pride in being a family company with three generations involved in the day-to-day business and a support team second to none. We centre our business on honesty, professionalism and service. Over the years we have sold thousands of spas to clients throughout the UK and now have offices in many European countries including France, Spain, Belgium, Denmark, Sweden, Norway, Italy and Portugal to name a few.

When you choose a Catalina you are not just choosing a spa, you are choosing a product developed over years of research and experience. We take great pride in our products and service, they have made Catalina one of the leading international spa and hot tub brands.

We never forget you have a choice!

If you should need help or advice, do not hesitate to contact either your local supplier or our office direct.

Stephen Crabb MISPE
Director

Each Catalina World Series comes with Thermo Pane foam insulation and a Deluxe UL Listed insulation/safety cover. All of our models are available with the Catalina Eco Heat System. This is an air source heat pump that helps save money and the environment as it produces more energy than it uses.
