

AquaSParkle

Ezy-Float

Key Features

- Pre-filled chlorine dispenser
- 2 – 4 week treatment
- Slow, consistent chlorine release
- Suitable for up to 5,000 litres of water
- 2 x 80g Ezy-Float per pack

Ideal free chlorine range: 3 – 5mg/l (1 – 3mg/l for swimming pools)

Prior to using this product, adjust the pH level to the ideal range of 7.2 – 7.6. Ezy-Float releases chlorine slowly over a period of 2 – 4 weeks depending on water flow.

Application Instructions

1. Read the label thoroughly before removing the sleeve via the double perforation marks.
2. Rotate the base of the dispenser to expose one to three holes. As a guide, expose one hole per 680 litres of water, although water flow will affect tablet solubility.
3. Place the Ezy-Float dispenser in your hot tub or pool water in the upright position.

Note: Chlorine consumption may vary depending on water temperature, bather load and weather.
