

AquaSParkle

Hot Tub Conditioner

Key Features

- Enhances feel and quality of hot tub water
- Contains lavender oil for enhanced bathing
- Prevents biofilm formation – fewer problems
- Pre-measured, 120ml one-treatment sachet

AquaSParkle Hot Tub Conditioner contains a blend of compounds to enhance the quality and feel of water, reduce chemical consumption and prevent biofilm formation in pipework.

Application Instructions

1. Maintain sanitiser and pH levels within the recommended ranges.
2. After opening the sachet via the “scissors cut area”, pour the whole sachet of Hot Tub Conditioner directly into the hot tub water.
3. For optimal results, **Dose weekly**: one 120ml sachet per 1,500 litres of hot tub water.

Note: Shake the sachet well before applying.
