## TRADITIONAL UMBRELLA COMPATIBILITY MATRIX

Pairing an umbrella with a side table or base that best suits your space is a breeze.

- **1.5"/38MM REDUCER NEEDED:** Indicates the umbrella/table pairing is recommended with a pole reducer to reduce the likelihood of wiggling within the space between the pole and the umbrella hole of the table. 1.5" poles in Signature Side Tables are recommended with this reducer.
- ★ **2"/50MM ADAPTER NEEDED:** Indicates the base is required with a pole adapter. 2" poles in a typical 1.5" in-ground pool sleeve are recommended with this reducer.
- ◇ **SPECIALTY REDUCER:** Indicates the base can completely support the umbrella, but has an optional specialty reducer to reduce the likelihood of wiggling within the space between the pole and the umbrella hole of the base. The specialty reducer is not required.
- ▲ **FREE-STANDING (WITH BASE SUPPORT):** Indicates the base is recommended as a free-standing option. 18" stems should always be used when in this application.
- **WORKS WITH BASE & DINING TABLE:** Indicates the base is a suitable size for use beneath a table when combined with a base. Ledge Lounger Mainstay Dining Tables can accommodate these base x umbrella pairings. 8" stems should always be used when in this application.
- ✕ **NOT COMPATIBLE**
