

## VINYL, STONE & TILE CLEANER

### GENERAL INSTRUCTIONS

1. Wear protective gloves and use outdoors/well ventilated area. Avoid use on windy days.
2. Prior to cleaning ensure the area to be treated is rinsed with water and free from loose debris such as dirt, leaves and chewing gum.
3. Rinse the area to be cleaned with fresh water, a hose pipe is ideal to remove loose pollution.
4. Turn the nozzle on the trigger spray applicator to the spray position.
5. Thoroughly spray the area to be cleaned. After use turn the nozzle of the spray applicator to the stop position and store the bottle safely.
6. Using a suitable cleaning applicator scrub the area where the product has been applied for 2-3 minutes. At this stage foaming may occur. Leave the product to stand for a minimum 5 minutes.
7. Rinse the treated area thoroughly with fresh water from a hose pipe - at this stage foaming may increase. Continue rinsing until foaming stops.
8. Heavily soiled areas may require a second application.
